Networking & Others: Cisco (Basic Networking), Basic Troubleshooting

EXPERIENCE

Capstone Project – Cafédéracion POS System

Role: System Developer / Programmer

- Developed a Point-of-Sale (POS) system for café operations
- Designed and implemented features such as order management, sales tracking, RFID Card
- Used PHP, Laravel, MySQL, and Bootstrap for system development
- Successfully defended the project as part of academic requirements

PROJECTS

Cafédéracion POS System

March 2026

- Web-based POS system for café operations
- Features: order management, sales tracking, RFID integration
- Tech: PHP, Laravel, MySQL, Bootstrap

Library Management System

April 2025

- Desktop-based system for managing library records and transactions
- Features: book inventory, borrowing/returning system, and user management
- Tech: C# (.NET Framework), MySQL

Attendance Monitoring System

April 2025

- Desktop-based attendance tracking system for students/employees
- Features: time-in/time-out logging and record management
- Tech: C# (.NET Framework), MySQL

Gymbulag System

June 2024

- Desktop application for gym-related management processes
- Features: member records, registration, and tracking
- Tech: C# (.NET Framework), MySQL

EDUCATION

PHINMA SAINT JUDE COLLEGE MANILA

Manila, Philippines

Bachelor of Science in Information Technology/3rd Year

2023 - Present

- Grades: 2.0 GWA Consistent Present
- Courseworks: Data Structures and Algorithms, Web Systems, and Application Development
